

# The Merchants Trust PLC

As focused on dividends as you are

## Aim

The Trust's objective is to provide an above average level of income, income growth and long-term growth of capital through a policy of investing mainly in higher yielding large UK companies.

## History

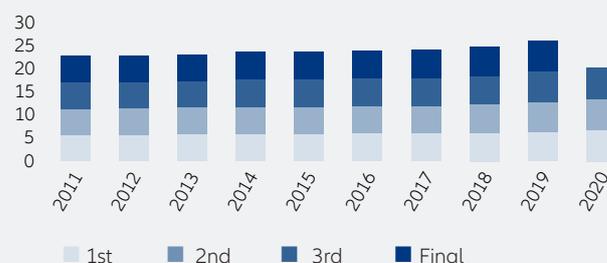

The Merchants Trust PLC was incorporated in February 1889, making it the oldest of the investment trusts in the Allianz Global Investors stable. Initially it invested in the fixed interest securities of railway companies in the USA, Canada and South America, but now concentrates primarily on major UK companies with an above average rate of dividend yield.

## Trust Benefits

Merchants has for many years focused on a simple proposition to deliver a high and rising income together with capital growth for its shareholders. Simon Gergel has been managing the trust for ten years, investing in a diversified portfolio of large, well-established and well-known UK companies. Although past performance is no guide to the future, Merchants has paid increasingly higher dividends to its shareholders year on year for the last 37 years.

## Ten Year Dividend History

### Dividend Record in Pence per Share To Year End 31 January

### Last Four Dividend Payments per Share

Record Date	Pay Date	Dividend	Type
31.01.2020	11.03.2020	6.80p	3rd Quarterly
04.10.2019	12.11.2019	6.80p	2nd Quarterly
12.07.2019	20.08.2019	6.70p	1st Quarterly
12.04.2019	22.05.2019	6.60p	Final

Past performance is not a reliable indicator of future results.

A ranking, a rating or an award provides no indicator of future performance and is not constant over time.

The RSMR rating is designed for use by professional advisers and intermediaries as part of their advice process. This rating is not a recommendation to buy. If you need further information or are in doubt then you should consult a professional adviser.

**5.7%**

Gearing

**19.1%**

**Share Price** is the price of a single ordinary share, as determined by the stock market. The share price above is the mid-market price at market close.

**Net Asset Value (NAV) per Share** is calculated as available shareholders' funds divided by the number of shares in issue, with shareholders' funds taken to be the net value of all the company's assets after deducting liabilities.

The NAV figure above is based on the fair/

market value cum income of the company's long-term debt and preference shares (known as debt at market value). This allows for the valuation of long-term debt and preference shares at fair value or current market price, rather than at final repayment value (known as debt at par).

**Premium/Discount.** Since investment company shares are traded on a stock market, the share price that you get may be higher or lower than the NAV. The difference is known as a premium or discount.

**Dividend Yield** is calculated using the latest full year dividend divided by the current share price.

**Gearing** is a measure of a company's financial leverage and shows the extent to which its operations are funded by lenders versus shareholders.

## Fund Manager's Review

February was a busy month for corporate reporting. Although some companies reported difficult trading conditions, affected by supply chain disruptions from the coronavirus Covid-19 in Asia, the stock market was steady for the first three weeks. However, markets then fell sharply in the last week, as Italy reported numerous cases of the disease and investors feared that it would become impossible to contain. Over the month the UK stock market fell by nearly 9%, in total return terms. Concern that economic growth would be impacted, led to bond yields falling sharply, with the 10 year gilt yield around 0.44% at the month end.

The worst performing sectors of the market included travel & leisure, as airlines, cruise companies and hotels were impacted by fears over travel. The commodity sectors, oil & gas and mining, were also very weak as commodity prices pulled back. The strongest performing sectors included utilities and healthcare equipment and services, which are more defensive areas.

The portfolio underperformed the market in February after very strong performance in the preceding months. The Trust's NAV fell by 13.1% in February, ending the month behind the -8.9% return of the market. The biggest detractors from performance included Imperial Brands and WPP which both had disappointing trading statements, whilst Keller underperformed despite little news, and HSBC (not owned) outperformed the falling market. On the positive side, utilities SSE and Pennon performed well, IG Group benefitted from increased market volatility and BAE Systems reported strong results.

There were no significant changes to the investment portfolio structure in

**“ we continue to hold a diversified portfolio of companies with diverse end markets, geographic exposures and economic sensitivities**

February. However, we took advantage of share price movements to add to companies that had underperformed and offered better value, such as Royal Dutch Shell, Landsec, National Express and Imperial Brands. This was funded largely by profit taking in shares that had performed well and

### Simon Gergel, Portfolio Manager

The Merchants Trust PLC is managed by Simon Gergel who is Chief Investment Officer at AllianzGI and has 27 years investment experience. He is pictured here with Matthew Tillet, UK equity portfolio manager. Simon joined AllianzGI in April 2006 from HSBC Halbis Partners where he managed over £900m in high income funds as well as core institutional and life UK equity portfolios. Prior to joining HSBC, Simon worked for 14 years at Phillips & Drew Fund Management / UBS Asset Management.

were closer to fair value, such as Pennon, GSK and Sirius Real Estate.

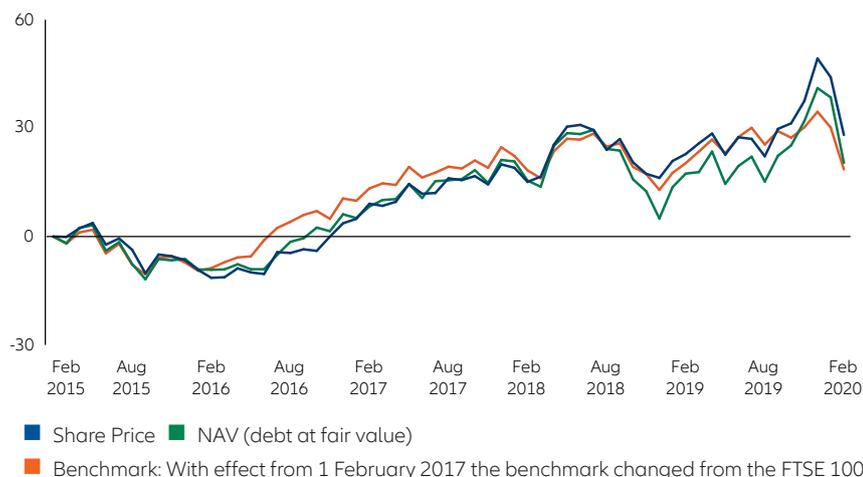

With the sharp pull back in the market, many companies' shares are now offering very good value again. Clearly, there is an increased risk of economic disruption from Covid-19, and trying to ascribe a probability to different scenarios is fraught with difficulty. With that in mind, we continue to hold a diversified portfolio of companies with diverse end markets, geographic exposures and economic sensitivities. Some of these are more vulnerable to economic shocks than others, which are relatively defensive. But we are confident that these businesses offer good value, and on a medium to long term view, they should provide income, dividend growth and total returns commensurate with Merchants' objectives.

## Performance Track Record

### Five Year Performance (%)

### Risk & Features

Investment trusts are quoted companies listed on the London Stock Exchange. Their share prices are determined by factors including the balance of supply and demand in the market.

Merchants seeks to enhance returns for its shareholders through gearing which can boost the Trust's returns when investments perform well, though losses can be magnified when investments lose value. You should be aware that this Trust may be subject to sudden and large falls in value and you could suffer substantial capital loss.

Derivatives may be used to manage the Trust efficiently.

### Cumulative Returns (%)

	3M	6M	1Y	3Y	5Y
Share Price	-6.8	4.8	4.3	17.5	28.1
NAV (debt at fair value)	-8.7	2.6	0.7	9.2	18.3
Benchmark	-8.9	-5.5	-1.4	4.7	18.6

### Discrete 12 Month Returns to 29 February (%)

	2020	2019	2018	2017	2016
Share Price	4.3	6.7	5.5	23.1	-11.4
NAV (debt at fair value)	0.7	1.7	6.6	19.3	-9.2
Benchmark	-1.4	1.7	4.4	24.2	-8.7

Past performance is not a reliable indicator of future returns. You should not make any assumptions on the future on the basis of performance information. The value of an investment and the income from it can fall as well as rise as a result of market fluctuations and you may not get back the amount originally invested. This investment trust charges 65% of its annual management fee to the capital account and 35% to revenue. This could lead to a higher level of income but capital growth will be constrained as a result.
