Investment trusts are quoted companies listed on the London Stock Exchange. Their share price is determined by factors including demand, or lack of, which means that the shares may trade below (at a discount to) or above (at a premium to) the underlying net asset value.

In line with industry best practice, Net Asset Values (NAVs) are now shown that take into account the 'fair value' of debt. NAVs – namely available shareholders' funds divided by the number of shares in issue, with shareholders' funds calculated as the net value of all the company's assets having deducted liabilities – are now calculated after allowing for the valuation of debt at fair value or current market price, rather than at final repayment value. Most professional advisers and institutional investors already allow for fair value of debt when assessing NAV and discount information, so this change provides private investors with information which takes into account a more realistic impact of the cost of debt and thus a more realistic discount.

Fund Manager

Nigel Lanning

The Merchants Trust PLC

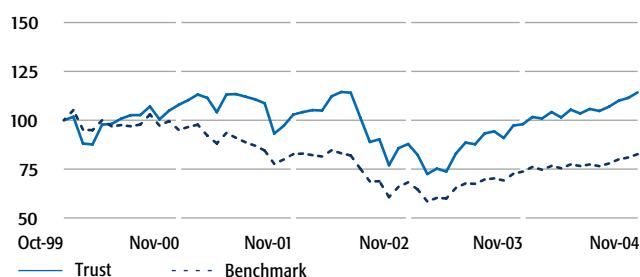

Fund Manager's Review

The UK market made further modest progress in November as investors became increasingly optimistic that UK interest rates have peaked. Sentiment was also helped by a down-scaling of US interest rate expectations and further positive news on company cash-flows and dividends. Ironically these trends followed on from a lowering of growth expectations after weak GDP data for the third quarter of this year.

Against this background the market was led by cyclical stocks such as those in the mining, chemicals and steel sectors, whilst life assurance also did well. In contrast pharmaceuticals, retailers and electricity were weak. An example from the electricity sector was Scottish Power, which is not held in the portfolio. The portfolio was also helped in relative terms through not holding AstraZeneca (pharmaceuticals sector), though holdings in house builders and retailers had a negative impact. Overall the Trust slightly outperformed the FTSE100 Index.

Key changes to the portfolio during November included the sales of holdings in Boots, Sainsbury and ICAP, whilst there were purchases of Anglo American, BOC and Vodafone. In the latter case this followed a change in dividend policy. The market outlook remains reasonably encouraging up to the year end, and there still appear to be useful opportunities to invest in high-yielding shares. There are 58 holdings in the portfolio..

Fund Performance

Source: Russell/Mellon/Allianz Dresdner Asset Management. 30th November 99 to 30th November 04, Total Return, net income reinvested, calculation indexed, UK Sterling. Please remember that past performance is not necessarily a guide to future performance. The value of an investment and the income from it can fall as well as rise as a result of market or currency fluctuations and you may not get back the amount originally invested. This investment trust charges 65% of its annual management fee to the capital account. This could lead to a higher level of income but a lower capital return.

Trust Aim & Characteristics

To provide an above average level of income and income growth together with long term growth of capital through a policy of investing mainly in higher yielding UK FTSE 100 companies.

*Merchants seeks to enhance returns for its shareholders through gearing, in the form of bank borrowings, to buy more investments. Gearing can boost the Trust's returns when investments perform well, though losses can be magnified when investments do badly. You should be aware that this Trust may be subject to sudden and large falls in value and you could suffer substantial capital loss.

Allianz Dresdner Asset Management is the marketing name of RCM (UK) Ltd., which is authorised and regulated by the Financial Services Authority. Issued by RCM (UK) Ltd. Registered office: 155 Bishopsgate, London, EC2M 3AD. Registered in England No. 2014586. Member of the Allianz Dresdner Asset Management Marketing Group. Member of the Allianz Group. History

The Merchants Trust PLC was incorporated in February 1889, making it the oldest of the investment trusts in the Allianz Dresdner Asset Management stable. Initially it invested mostly in the fixed interest securities of railway companies in the USA, Canada and South America; with the remainder held in Government securities and companies such as Castlemain Brewery in New South Wales. The Trust now concentrates primarily upon major UK companies with an above average rate of dividend yield.

Launch Date: February 1889.

Wind-up Date: None.
