

As focused on dividends as you are

The Merchants Trust PLC

Factsheet

30 September 2016

Aim

The Trust's objective is to provide an above average level of income, income growth and long-term growth of capital through a policy of investing mainly in higher yielding UK FTSE 100 companies.

History

The Merchants Trust PLC was incorporated in February 1889, making it the oldest of the investment trusts in the Allianz Global Investors stable. Initially it invested in the fixed interest securities of railway companies in the USA, Canada and South America, but now concentrates primarily on major UK companies with an above average rate of dividend yield.

Trust Benefits

Merchants has for many years focused on a simple proposition to deliver a high and rising income together with capital growth for its shareholders. Simon Gergel has been managing the trust for ten years, investing in a diversified portfolio of large, well-established and well-known UK companies. Although past performance is no guide to the future, after the Annual General Meeting in May, Merchants will have paid increasingly higher dividends to its shareholders year on year for the last 34 years.

Ten Year Dividend History

Net Dividend Record in Pence per Share to year end 31 January

Last Four Net Dividend Payments per Share

Record Date	Pay Date	Dividend	Type
07.10.2016	10.11.2016	6.00p	2nd Quarterly
15.07.2016	12.08.2016	6.00p	1st Quarterly

Share Price is the price of a single ordinary share, as determined by the stock market. The share price above is the mid-market price at market close.

Net Asset Value (NAV) per Share is calculated as available shareholders' funds divided by the number of shares in issue, with shareholders' funds taken to be the net value of all the company's assets after deducting liabilities.

The NAV figure above is based on the fair/market value of the company's long-term debt

and preference shares (known as debt at market value). This allows for the valuation of long-term debt and preference shares at fair value or current market price, rather than at final repayment value (known as debt at par).

Premium/Discount. Since investment company shares are traded on a stock market, the share price that you get may be higher or lower than the NAV. The difference is known as a premium or discount.

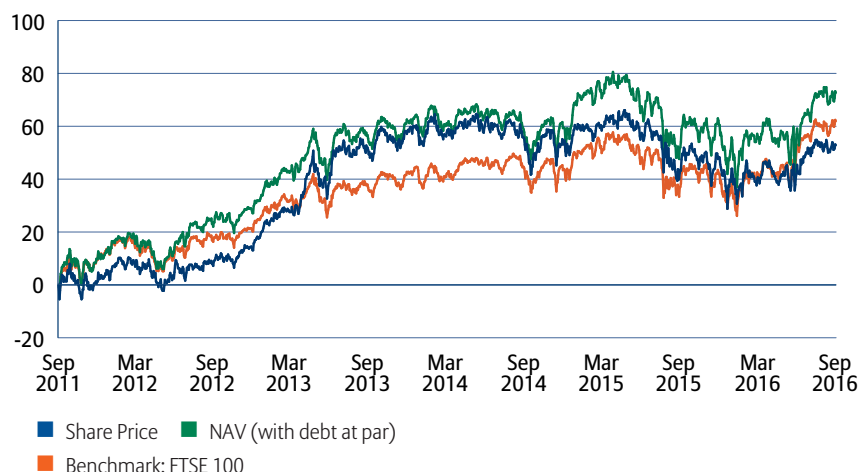

Dividend Yield is calculated using the latest full year dividend divided by the current share price.

Gearing is a measure of a company's financial leverage and shows the extent to which its operations are funded by lenders versus shareholders.

Risk & Features

Investment trusts are quoted companies listed on the London Stock Exchange. Their share prices are determined by factors including the balance of supply and demand in the market.

Merchants seeks to enhance returns for its shareholders through gearing which can boost the Trust's returns when investments perform well, though losses can be magnified when investments lose value. You should be aware that this Trust may be subject to sudden and large falls in value and you could suffer substantial capital loss.

Derivatives may be used to manage the Trust efficiently.

Cumulative Returns (%)

	3M	6M	1Y	3Y	5Y
Share Price	7.6	8.7	7.4	2.4	53.0
NAV	10.0	10.5	13.9	12.1	72.7
Benchmark	7.1	14.1	18.4	19.2	62.0

Discrete 12 Month Returns (%) to 30 September

	2012	2013	2014	2015	2016
Share Price	7.2	39.4	3.9	-8.3	7.4
NAV	22.0	26.2	2.5	-4.0	13.9
Benchmark	16.4	16.7	6.1	-5.1	18.4

Past performance is not a reliable indicator of future returns. You should not make any assumptions on the future on the basis of performance information. The value of an investment and the income from it can fall as well as rise as a result of market fluctuations and you may not get back the amount originally invested. This investment trust charges 65% of its annual management fee to the capital account and 35% to revenue. This could lead to a higher level of income but capital growth will be constrained as a result.
